Instructions:

- Step 1: Using 7mm jump rings attach one 8mm 6430 Classic Cut Pendant to one Heavy Hammered Ring. Then attach one 10mm pendant, one 14mm pendant, one 10mm pendant and one 8mm pendant. Make sure all pendants face forward. Repeat this step 3 more times and set aside.
- Step 2: Attach to either end of the chain the Coiled Hook and Eye by opening up the end links.
- Step 3: Now using the large charms made in Step 1 attach them evenly along the bracelet. Do this by opening up a link in the chain and attaching the Heavy Hammered Ring so the Sapphire pendants hang down.
- Step 4: Now using the Dotted Dap Circles attach one to the link in the chain one to the left of the link that the Heavy Hammered Ring is attached to. These circles should fall directly into the opening in the Heavy Hammered Ring.
