THE DOT STITCH VIDEO

To Make a Small Beaded Bead

Thread five core beads onto your thread. Add one loop of beads to the thread, then go through the core beads from the tail end to form the loop. Repeat creating loops four more times. Tie the thread off on each end by weaving through the loops. We secured the thread further by tying the needle thread to a loop thread and then weaving the tail inside it to hide it from view and then trimming.

To Make a Large Beaded Bead

Thread seven core beads onto your thread. Add one loop of beads to the thread, then go through the core beads from the tail end to form the loop. Repeat creating loops four more times. Tie the thread off and secure in the same manner as you did for small beaded beads.
